

Easy automation boosts efficiency of Dragon Medical One.

Advanced Step-by-Step Commands extend the power of Dragon Medical One.

Dragon® Medical One, a HITRUST CSF certified cloud-based speech recognition platform, provides a consistent and personalized clinical documentation experience that spans solutions, platforms, and devices regardless of physical location. Advanced Step-by-Step Commands, a built-in productivity tool included with Dragon Medical One, boosts efficiency and documentation quality by automating common tasks.

Intelligent voice commands automate complex tasks

Dragon Medical advanced step-by-step functionality allows clinicians to create personalized voice commands that execute one or more steps such as open, wait, enter text, or press a key. Clinicians easily build voice commands using an intuitive interface—recreating simple and intermediate commands—to achieve a high level of automation to increase clinician productivity.

Clinicians use an intuitive interface to easily create voice commands that execute common actions. In this example, the advanced step-by-step command initiates a referral email—Microsoft® Outlook launches, a new email message opens, the subject line contains “Referral,” and the cursor is placed in the body of the email—saving significant time and effort.

Key benefits

- Provides higher levels of automation to complete workflows
- Increases quality and completeness of documentation
- Improves physician and care team experience with the EHR and reduces documentation time
- Extends the value of Dragon Medical One
