I caught up with my backlog

"The mountain of admin became oppressive to the point where I just didn't want to do the job anymore. Then Dragon came along, and I caught up with a backlog of two years work in just three weeks."
— Karen Edwards, Occupational Therapist

Our doctors love it

"The ability of our doctors to now quickly and accurately dictate their documents has provided them with additional time to spend with their patients.The frustration they used to experience has evaporated. Seeing the considerable difference DMO has made, I can understand why our doctors tell us they 'love it'."
— Andrea Linden, CEO, Eye Surgery Associates

Streamline your documentation workflows with a revolutionary speech-to-text & dictation solution

45%
less time spent on documentation

Dictation done better

Dragon® Medical One is a high calibre conversational speech-to-text tool and documentation companion for medical professionals. It empowers clinicians to create comprehensive clinical documentation more efficiently using just their voice.

Accurate and personal

It is very easy to use and designed for speed, accuracy, and flexibility.
Dragon® Medical One comes with specialist medical vocabulary, which is customised to your subspecialty.

Additional features like a personal library of predefined text, automatic formatting, and step by step commands will help you save even more time.

Dragon® Medical One supports a more productive documentation experience before, during, and after the patient consultation.

Work smarter, not harder!
